### World Languages

The New Jersey Student Learning Standards – World Languages (NJSLS-WL) is a guiding document toward participation in the state’s global society. As one of the most diverse states in the United States, New Jersey encompasses a multicultural, global citizenry. In all regions, there are people speaking and interacting with others in different languages; there are street signs in several languages and international enterprises conducting business in English and in a multitude of other languages. The New Jersey Department of Education, whose mission is to equip students with necessary knowledge, skills, and attitudes to participate successfully in the 21st century, embraces the state’s multiculturalism and diversity, including the acquisition of diverse languages and cultures.

### Mission

World languages education provides learners with the essential language skills and cultural understandings in languages other than English necessary to live and work in a global, culturally diverse world.

### Vision

An education in world languages fosters a population that:

- Cultivates communication and cultural understanding in more than one language with the levels of language proficiency that are required to function in a variety of occupations and careers in the contemporary workplace.
- Exhibits attitudes, values, and skills that indicate a positive disposition and understanding of cultural differences and that enhances crosscultural communication.
- Participates in local and global communities with people who speak languages other than English to address social justice issues and other global problems.
- Values language learning for its long-term worth in advancing personal, work-related, and/or financial success in our increasingly interconnected world.

The study of world languages benefits all students by fostering academic success, cognitive flexibility, increased access to information from other content areas, employment opportunities, and the ability to function more effectively with understanding and respect in all environments encountered in their lives. To meet the high school graduation requirement (N.J.A.C. 6A: 8:5.1), the New Jersey Student Learning Standards – World Languages (NJSLS – WL) promotes an acquisition process that is research-based, spiraling and recursive, and aligned to appropriate proficiency targets that are designed to ultimately enable learners to attain Novice-High level proficiency or above, which is a requirement for high school graduation. All students have regular, sequential instruction in one or more world languages beginning in kindergarten and continuing at least through the freshman year of high school. Further, N.J.A.C. 6A:8-5.1(b)4 directs districts to actively encourage all students who otherwise meet the current-year requirement for high school graduation to continue their study of a second language through high school in order to reach higher proficiency levels. Opportunities to develop higher levels of proficiency should be based on personal and career interests. The number of years spent studying a language and the frequency of instruction impact the level of proficiency acquired in the language. This principle has historically been supported by research in the United States and abroad (Raymond, 2012). A three-year grant project (2005-08) administered by the New Jersey Department of Education supports these research findings. Data from the federally funded project that assessed the language proficiency of 60,000 8th-grade students presented compelling evidence for the need to develop programs that offer all students the opportunity to meet the statedesignated proficiency level of Novice-High. The data showed that programs offering a minimum of 540 hours of articulated instruction in classes that meet at least three times a week throughout the academic year produce a majority of students who can speak at the Novice-High proficiency level or higher. Consequently, the establishment and/or maintenance of quality, well- articulated language programs at the elementary and middle-school levels, as required by New Jersey Administrative Code, is critical for building the capacity of high school students to achieve the Novice-High level of language proficiency required for graduation.
